NY	2264	Egg Harbor	NY	Full	--	0.39%	--	8/17/20		--	Added at start of report	<p>9/24 Update: We have a travel team of about 15 people from Trenton NJ coming into Egg Harbor today. This team will help in zone 1 Camden NJ. This is our most difficult zone. -- We are continuing flow people from zone 6 across the ACO territory into zone 1, the drive from zone 6 is about an hour, but zone 6 is nearing close out, we need the people in zone 1. -- We are continuing to do heavy on-demand work assignments and reassignments, we are checking OCS in the late morning, and taking assignments away from people who are not working or cases that sitting in someone todo list. We are reassigning these cases to people with availability in the afternoon. -- The visiting LCFM and two CFM's from Waltham are continuing to work in the EH ACO. -- The ARCM is meeting with the two LCFM's every morning to discuss progress and strategies and what they need help with inorder to get to finish. -- The AM is intouch and engaged closely with the EH team. -- We are reducing the number of cases not started everyday, the ACO cleared 1153 of these yesterday.</p> <p>9/23 Update: A team of 14 people from Maine will be arriving in Egg Harbor tomorrow to help enumeration efforts. -- We will have a few additional people from Waltham join the Egg Harbor effort as well. -- The LCFM coordinated a conference call with the all CFS's in the three CFM zones closest to close out, Two Waltham CFS's experienced in close out were invite to discuss best practices on managing a team and work through closeout. -- Zone's 1 and 2 continue to be the biggest challenges, these zones cover the Camden NJ area, we are pushing people from Zone 3 and 4 into zone 2, just outside Camden, The people from zone 2 are moving into zone 1 downtown Camden. -- We are starting to get more pushback from the housing projects in Camden, NJ The housing project managers are growing tied of our visits,access is getting more difficult. Partnership (Thomas Mayfield) is helping helping negotiate continued access to these projects. These are getting more and more difficult.</p> <p>9/22 Update: We are using 4 CFS teams (15-18) each to enumerate Zone 1 CFS district 4 and 5. This is the heart of downtown Camden NJ, a very difficult area to enumerate. The teams are travelling into the area together with the CFS's. They are regrouping at several points during the day. The teams are enumerating Housing-project by housing-project and building by building. Enumerators are working in pairs when necessary. -- The Waltham Lead CFM is managing CFM zone 3,4,and 5. The LCFM is managing the CFM for these zones these zones into close out. THis LCFM is experienced and very good in close activities. -- Sean Brooks the Egg Harbor LFCM is managing zone 1,2 (Candent NJ area) and Zone 6 the coastal area. -- Both LCFM's are working together very well. -- No other major updates, what we have been doing has been working so far.</p> <p>9/21 Update: Another team of 21 people from the Waltham ACO is arriving today in Egg Harbor. They will help primarily in zone 6. -- We slightly shifted a CFM assignment to address some recent personal issues preventing a full commitment to the NRFU work, this CFM was moved to a better performing zone and will be assisted by our visiting LCFM. -- We continue to have dual LCFM's working together to manage her work. These two are working very well together. -- We continue to have daily RT presence in the ACO, to help with field operations and administration. -- The number of people with work availity dropped a bit yesterday (Sunday), the numbers have increased today and we are waiting to increase the number with ability as much as possible. -- CFS's are calling every enumerator on their teams everyday to discuss ability, asking for more hours, etc, -- The LCFM's and CFM are meeting every morning. -- The two visiting CFM's from Waltham are still onsite in Egg Harbor filling two CFM vacancies on the Egg Harbor staff.</p> <p>9/18 Update: The Waltham LCFM is back working in the Egg Harbor ACO today, He will remain until in EH the end of the operation.</p>

Two versions of projection NRFU Completion

Scenario A – Previous Day Method

- This is a simple straight-line projection of a state's progress based on previous day's rate of completion. The projected pace of work completion is constant, meaning the percentage of work completed yesterday will be the same every day until 99% is reached. It assumes no decline in productivity.

Advantages:

- Incorporates the current staffing and productivity.
- An accurate "predictor" for close-day calculations (the next day or two)

Disadvantages

- For areas with current progress of 90-95%, it can be highly optimistic as it does not account for the slowdown that takes place with the most difficult cases as progress approaches 99%.
- It is susceptible to predictable, daily fluctuations in productivity. Sundays are less productive than Tuesdays. NRFU productivity during SBE activities was lower.
- Can be highly variable based on local conditions – weather, fires, civil unrest, etc.

Scenario B – "Banded" Method

- This is a projection based on the pattern of completion for previous states, based on the progress at different intervals of completion. It uses "bands" of completion rates which apply to all states within the "band". It incorporates a higher rate of productivity at lower rates of completion and assumes a significant slowing as rates approach 99%. It uses average rates of completion for states which have already passed these intervals.

Advantages:

- Reflects the decline in productivity as completion rates near 99%
- Uses "real" completion data

Disadvantages:

- Does not account for recent interventions, such as staffing, travelers and workload reconfigurations. Some of these are significant.
- Reflects work during the period when restrictions were in place as a result of the TRO.
- Includes the "learning curve" of managers figuring out the system and the finishing process. We know the first few states were very difficult to finish because of issues with systems and procedures.

Scenario A - When a State will hit 99% Enumeration Completion
